Summary

Professional web developer with over 10 years of experience developing projects with PHP. I have extensive knowledge of technologies such as HTML, CSS, JavaScript, MySQL, Git, and Docker too.

Skills

Languages & Frameworks: PHP, JavaScript, TypeScript, Laravel, CakePHP, NodeJS, NextJS

CMS, E-Commerce & No code: Wordpress, PrestaShop, Shopify, n8n

UX & AI: CSS, Bootstrap, Tailwind CSS, Figma, Gemini, Claude, ChatGPT

Databases & Cloud: MySQL, PostgreSQL, AWS (Lambda, Code Commit, CloudFormation), Digital Ocean (Droplets)

Testing, ORM & Integrations: PHPUnit, Doctrine, Eloquent, Prisma, API REST, SOAP

Languages: Spanish (native), English (B1)

Professional experience

Dekoarte | FullStack Developer (Sep 2024 - Present)

Led the digital transformation of the e-commerce store by executing a comprehensive platform migration from PrestaShop to Shopify, customizing the selected theme to seamlessly align with the brand's visual identity and design guidelines. To optimize the post-purchase experience and operational efficiency, I implemented automated workflows for order notifications via WhatsApp and developed an integration with the GLS API for real-time shipment tracking and updates. Currently, I am driving the technical diagnostics and performance optimization of the site, focusing on continuous improvements to Core Web Vitals to boost page speed, user retention, and overall SEO ranking.

Proyecto Online | Web Developer (Sep 2021 - Jul 2026)

Manage CMS solutions with WordPress and e-commerce solutions with PrestaShop and WooCommerce.

Develop plugins or modules to extend website functionality.

Implement and extend custom themes.

Integrate external systems via APIs.

Import previously collected data into websites (categories, products, customers).

Use page builders to build sections.

Deploy projects on hosting and in Docker containers.

Perform maintenance and security updates.

Alegra | Backend Developer (Oct 2023 - Jan 2024)

Develop backend projects in the company's Income area using the PHP Zend Framework.

Perform frontend maintenance using Sencha.

Update entities and relationships in the MySQL database.

Run end-to-end testing using Cypress.

Manage LAMBDA functions, repositories (Code Commit), and deployments (CloudFormation) on AWS.

Manage activities with the team using SCRUM.

Education

B.S. in Computer Science - Universidad Nacional Experimental de la Gran Caracas (2019)
